📁 Projects

Discord TUI

08/06/2026 – 15/06/2026

This project is a **Discord terminal client** implemented as a **Terminal User Interface (TUI)**. Its purpose is to allow users to browse servers, channels, members, and messages directly from the command line, without requiring the graphical Discord application.

StudyStash

12/05/2025 – 23/05/2025

A website that allows users to store notes (for example, for university) and files of various types. It can also be used to convert images into PDF documents.

MelodyShare

12/05/2025 – 23/05/2025

A desktop application that allows users to authenticate with Spotify and view statistics and insights about their listening habits. It also includes a real-time chat feature powered by WebSockets.

FIFO Server

06/01/2026 – 12/01/2026

A server designed for inter-process communication using

FIFOs. It listens for incoming connections and creates a new FIFO for each client to handle communication independently.

Interconnected

16/06/2025 - 25/06/2025

A platformer game developed in Unity. It uses **Render to Texture** to combine 2D and 3D perspectives, and features hand-crafted animations and textures.

Logical Expressions Calculator

15/04/2025 - 19/04/2025

A website that calculates the truth table for any correctly written logical expression using Polish notation.

Conferences & Seminars

LSEG Quant Challenge 2026

27/03/2026 - 27/03/2026

Bucharest

Worked in a team to develop an interactive web application that converts natural language user queries into dynamic diagrams using a generative model.

11th CASSINI Hackathon 2026

24/04/2026 - 26/04/2026

Bucharest

Worked in a team of 8 to develop a web application that uses satellite data to prevent natural disasters. Gained a lot of Git experience.
